

EDUCATION FOR THE SDG'S

Saudi Arabia is firmly committed to achieving the 2030 Agenda for Sustainable Development by taking innovative measures and approaches to align the 2030 Agenda and the Saudi Vision 2030, which is an ambitious development plan built around three themes: a vibrant society, a prosperous economy and an ambitious nation and shares the same time frame and end goals with the SDG agenda. Furthermore, the Saudi 2030 Vision is a strategic plan to reduce the country's dependence on oil. This plan considers diversifying the economy and developing sectors such as health, education, infrastructure, recreation and tourism, and in this way also contribute to the fulfillment of the SDGs. PNU as a government entity supports and welcomes the different guidelines that the state defines to comply with the 2030 vision and therefore the SDGs.
