A Guide to Majors & Specializations

In Princess Nourah bint Abdulrahman University

In the Name of Allah, the Most Gracious, the Most Merciful

Nourah bint Abdulrahman University .. Edifice of Empowerment

The education of women in the Kingdom of Saudi Arabia received a lot of care and attention that empowered Saudi Arabian women to move forward confidently with steady pace towards achieving their ambition and prove their excellence in all fields, and to stand out locally and internationally. There are shining examples of renowned educated Saudi women and researchers who are known by name at international arenas and fields of science for their success and competence and for being on the same footing with their counterparts in the other developed countries.

Princess Nourah bint Abdulrahman University is a living example of the care and attention attached to the higher education of women in the Kingdom of Saudi Arabia. Such care and attention began early with the establishment of the General Presidency for Girls Education in 1390H [1970G] which was the first education college for girls in the Kingdom. This achievement was followed by the opening of colleges for girls successively until they reached 102 colleges including university and intermediate colleges as well as community colleges distributed in 72 Saudi cities featuring 600,000 female students. In Riyadh alone, there are six colleges namely the college of education for literal sections, college of education for scientific sections, college of education for preparation of teachers, social service college, college of education for household economy and the college of arts.

In 1427H, a Royal Decree was issued to establish the first girls' university in Riyadh under the supervision of the Minister of Higher Education. Such university included all six colleges in Riyadh city following their restructuring. Several new colleges had also been established to serve the development process in the Kingdom. The university was inaugurated in 1428H with the appointment of the first female Rector HRH Dr. Al-Jawhara bint Fahad Al Saud.

On Wednesday 1429/10/29H, the university was honored by the Custodian of the Two Holy Mosques late King Abdullah bin Abdul Aziz Al Saud, who laid the foundation stone for the university campus and the university name was then changed to Princess Nourah bint Abdulrahman University in honor of the sister of the founder of the Kingdom of Saudi Arabia late King Abdulaziz bin Abdulrahman Al Saud [May Allah have mercy on them all].

Introduction

The University Agency for Educational Affairs is dedicating its efforts to improve the current academic programs and to introduce advanced academic programs based on personal and professional skills in accordance with the local and international quality standards and the instructions of the university administration in collaboration with all the colleges, deanships and related centers. The purpose is to graduate highly competent Saudi Arabian women to actively contribute to building the knowledge-based economy. Saudi women shall be empowered in all sectors through attractive and stimulating academic environment to achieve the highest quality standards in education and development of curriculums and study plans to ensure the realization of the Saudi 2030 vision and support the education process and the strategic goals and aspirations of the university. The Agency is keen to coordinate with all related parties in order to enrich the expertise of the female students.

In conclusion, May Allah preserve the Kingdom of Saudi Arabia and keep it safe and secured and May Allah preserve the Custodian of the Two Holy Mosques King Salman bin Abdulaziz Al Saud and the Crown Prince HRH Prince Mohammed bin Salman bin Abdulaziz. We also pray to Allah to make us be up to the expectations of our leadership.

Vice-Rector for Educational Affairs

Dr. Nawal Mohammed Al-Rasheed

Admission and Registration Deanship is keen to play its role in providing the necessary information and services to facilitate the educational process, introduce the rules and regulations starting from the admission and until the graduation using the best means of modern technology. The goal is to ensure the development and improvement, facilitate the procedures and promote the awareness among all the university personnel.

Considering the importance of striking balance between the output of the university and all development and labor market requirements, the Deanship decided to issue an annual guide entitled "A Guide to Majors and Specializations in Princess Nourah bin Abdulrahman University". It is a notebook for the higher secondary school student to help them choose and acquaint themselves with the academic specializations depending on their abilities, desires, preparedness and inclinations. This would help boost the actual integration and psychological security as well as the desire to study a certain specialization and achieve the desired future career.

It gives me pleasure to extend my profound thanks and gratitude to the University Rector Professor / Einas bint Suleiman Al-Eaisa for all the support provided to the Deanship. I would like also to thank the Vice-Rector for Educational Affairs Dr. Nawal Mohammed Al-Rasheed for her strenuous efforts in developing the current academic programs and environment. My thanks are also extended to all the university colleges and to the admission vice dean of admission and registration deanship Dr. Muzna bint Mizal Al-Eid and to all members of the team for their relentless efforts in order to make the success of this work possible.

We pray to God to help us all.

Dean of Admission and Registration

Dr. Farah Mansour Al-askar

University Colleges

B.Sc. degree:

Health Colleges:

- Human medicine
- Dentistry
- College of Pharmacy
- College of Health and Rehabilitation Sciences
- Nursing College

Diplomas:

- Applied College

Institutes:

- Institute of Arabic Language for Non-Native Speakers
- Institute of English Language

Scientific Colleges:

- College of Engineering
- College of Computer Science and Information Technology
- College of Business Administration
- College of Sciences
- College of Sport sciences And Physical Activity

Humanities Colleges:

- College of Art and Design
- College of Law
- College of Education and Human Development
- College of Languages
- College of Humanities And Social Sciences

Princess Nourah bint Abdulrahman University Admission System:

Admission for Princess Nourah bint Abdulrahman University shall be made through the Unified Electronic Admission Portal for public universities in the city of Riyadh on one of the announced programs. Eligibility for selection of the college shall be in accordance with the university standards and the specific capacity of the colleges.

Princess Nourah bint Abdulrahman University General Admission Requirements:

1. The student shall be Saudi national or from a Saudi mother.
2. The student must be holding a higher secondary school completion certificate or equivalent obtained inside or outside the Kingdom.
3. For the student, no more than five years must have elapsed since her acquisition of the higher secondary school completion certificate or equivalent.
4. The student must have passed the aptitude and achievements test of the National Center for Assessment (this condition applies on all graduates of the higher secondary school inside or outside the Kingdom of Saudi Arabia in accordance with the Saudi or non-Saudi curriculums).
5. The student must meet the announced admission requirements, or any other conditions set by the University Council and announced at the time of admission.
6. The student must successfully pass any test or interview set by the university.
7. The student must be medically fit.

8. The student's medical and psychological condition must fit in with the medical specializations. If found to be otherwise, the university may transfer the student to the other specializations inside the university.
9. The student's medical and physical condition must fit in with the physical sports specialization and her Body Mass Index (BMI) must be within the normal limits (between 18.5 and 24.9) ($BMI = kg/m^2$). If found to be otherwise, the university may transfer the student to the other specializations inside the university.
10. The student must not be restricted, admitted or had already obtained a B.Sc. degree or had been terminated for disciplinary reasons from a public university in the Kingdom or any other university. If this is proved to be true, the university may terminate the student's admission.
11. The student must not have prior record at Princess Nourah bint Abdulrahman University or had earlier obtained (a diploma from the Applied College or B.Sc. degree from it).

Princess Nourah bint Abdulrahman University Admission Procedures:

1. Accessing the Unified Electronic Admission Portal for public universities in the city of Riyadh for public universities and colleges of technology in Riyadh to review the timetable for the Unified Electronic Admission and comply with the announced admission dates and procedures.
2. Passing any test or interview set by the university.
3. Announcing the candidates eligible for admission on the Unified Electronic Admission Portal for public universities and colleges of technology in Riyadh and making the selection based on the announced admission criteria, order of desires, availability of seats and admission requirements at the colleges and the capacity of the university.
4. Confirming the admission through the Unified Electronic Admission Portal for female students.
5. Entering the data of the students whose admission is confirmed through the Unified Electronic Admission Portal in the university system and their acquisition of university numbers.
6. Sending text messages to the cell phones of the admitted students including the university numbers, password, method of entry to the academic system and the university mail.
7. The student shall pursue the university website to know the dates for English Placement Test, granting of the university card and the ATM card.
8. The student shall follow-up the instructions and alerts through her account in the Unified Electronic Admission Portal for female student and the website of the university to which the student is nominated.

Required Documents:

For the Saudi Arabian student: There are no documents required since confirmation of the admission is done electronically and hence there is no need to submit any documents.

For the non-Saudi student from a Saudi mother: She must appear at the Admission Administration in the university at the specified time accompanied by the following documents:

1. Original residency permit (Iqama) together with the passport.
2. Original birth certificate with duplicate copies of same.
3. National identification card of the student's mother with duplicate copies of same.

Cancellation of Admission at Nourah bint Abdulrahman University:

Student's admission at Nourah bint Abdulrahman University shall be cancelled in the following instances:

1. Non-compliance with the admission requirements announced by the university.
2. Entry, by the student, of incorrect data in the electronic admission application.
3. Existence of a previous record for the student at the university.
4. Failure to attend the test or the interview required by some colleges.
5. Failure to complete the admission procedures during the announced time period.
6. If the student is proved to be admitted by another university according to the information received from the Ministry of Education.

Academic Specializations:

How to choose your suitable academic specialization:

1. Read and review the specializations and their academic nature as well as the study plans.
2. Determine the job opportunities for every academic specialization.
3. Specify the set of specializations desired by the student and rank them in an order of priority.
4. Student must understand her real inclinations, abilities and skills.
5. Compare between the student's abilities and her skills and the nature of specializations and specify the specialization that agrees with her.
6. In case the student is unable to determine the specialization, she has to consult whomsoever she sees suitable. However, the selection shall be the student's decision.

Academic Specializations of Nourah bint Abdulrahman University:

- Medical and health specializations.
- Scientific and applied specializations.
- Humanities and educational specializations.
- Applied college specializations.

Firstly: Medical and Health Specializations

- Human medicine
- Dentistry
- College of Pharmacy
- College of Health and Rehabilitation Sciences
- Nursing College

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Human medicine	—	Medicine and Surgery	English	*7	Scientific	B.Sc. degree in Medicine and Surgery	To qualify students scientifically and practically in the field of human medicine by a way of education based on problem-solving beginning with study of basic medical students then turning to the clinical years to study the various specializations of clinical medicine and training at specialized hospitals to graduate as qualified physicians equipped with the necessary professional skills in accordance with the international medical standards.	Physicians operating in the public health, educational or private sector, and as researchers in the various medical fields including the preventive, diagnostic and remedial sciences.

*(Foundation year + 5 years of specialization + year of internship)

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Dentistry	—	Dental and Oral Surgery	English	*7	Scientific	B.Sc. degree in Dental and Oral Surgery	It is a comprehensive specialization covering all areas of dentistry to enable the graduate to gain the highest levels of professional skills and medical ethics. The purpose is to meet the needs of the society, provide health care and apply international standards in the field of dental and oral surgery. This is aside from boosting the necessary scientific and practical skills through practical exercises received by the intern to best use the available resources and new technology through theoretical, practical and clinical studies and to adopt innovative ways of instruction such as the simulators and to exercise self-education and continuous education.	Public and private sector hospitals and dispensaries, maternity and childcare centers, dental research field and academic teaching sector.

*(Foundation year + 5 years of specialization + year of internship)

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Pharmacy	—	Pharmacist	English	9*	Scientific	B.Sc. degree in Pharmacy	The program aims to build human capabilities in the field of pharmacy and to contribute to the development of the pharmacy profession standards through advanced educational strategies that rely on simulation education system and problem solving. The purpose is to prepare qualified pharmacists to provide high quality pharmaceutical services and to realize distinction and innovation in the patients care domain as well as in scientific research and community health, and to support human, social and economic development. The graduate in this specialization, with her gained knowledge, experience and clinical skills, can play an effective role in understanding the medical diagnosis and selection of the suitable medicine and the right dose and finding other alternative medicines if necessary.	Public and private sector hospitals as practicing pharmacist or clinical pharmacist, Ministry of Health medical supplies, pharmaceutical services at all public and private sectors, research and development centers, Saudi Food and Medicines Authority (SFDA), monitoring and follow-up authorities for pharmaceutical products, drug and poison analysis centers, pharmaceutical factories, pharmaceutical marketing companies and medical products.

*(Foundation year + 4 years of specialization + year of internship)

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Health and Qualification Sciences	Health Sciences	Health Education	English	*5	Scientific	B.Sc. degree in Health Education	The specialization is designed to create specialized personnel with competitive abilities in the field of health education or research to contribute actively to the community participation to bolster the health and enhance the quality of life. Their specialization includes formulation of strategic plans for the promotion of health education and awareness, as well as preparation of cultural programs for prevention against the disease and its complications. The goal is to raise health awareness for the individual and the community and to promote the culture of preventive health.	Medical and academic sectors, various authorities and organizations including behavioral and health education, environmental and professional education in the media, and health education at schools and education for patients.
		Clinical Nutrition				B.Sc. degree in Clinical Nutrition	The specialization aims to qualify personnel of high competence in clinical nutrition and disease prevention by acquainting the graduates with the basic rules of clinical nutrition in terms of knowledge and skill and how to know the food elements and basics of food planning along with detection of health issues pertaining to nutrition and application of appropriate food programs for various categories in health and disease.	Public & private hospitals, health centers, qualification centers, clinics & medical research centers, food supplements companies and centers, primary health care centers, awareness centers at schools and educational institutions, sports centers, health authorities and committees, qualification and health care centers, healthy food companies & special food stores.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Health and Qualification Sciences	—	Epidemiology	English	*5	Scientific	B.Sc. degree in Epidemiology	The specialization aims to prepare specialized personnel endowed with knowledge and skills in the of epidemiology, scientific research and community service to enhance public health, fight diseases & upgrade health conditions to preserve the health of the population and public health with emphasis on the causes of diseases and ways of prevention against them and identifying the necessary basic information and enough evidence to plan, execute and evaluate the health services with the aim of exercising effective and direct disease control, prevention and treatment.	Local and international centers, agencies and institutions concerned with public health, public and private hospitals, health centers and research centers.
		Clinical Psychology				B.Sc. degree in Clinical Psychology	It is the spinal cord of psychological sciences. It is an applied branch of psychology and a medical specialization concerned with psychological health. It aims to determine the individual behavior and his potentials using measuring and analysis methods and observation. It also provides tests and recommendations for individual interdependence following medical examination and analysis of personal data using scientific means to assist and cure persons with therapeutic psychiatric disorders.	Public and private hospitals, health centers, qualification centers and clinics.

*(Foundation year + 3 years of specialization + year of internship)

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Health and Qualification Sciences	Radiological Sciences	Epidemiology	English	* 5	Scientific	B.Sc. degree in diagnostic radiology	The specialization aims to prepare highly competent female staff with distinguished ability in radiological diagnosis. The graduate shall be equipped with knowledge and various skills in radiological diagnosis, radiology and medical imaging technology and its supportive sciences as well as taking adequate safety measures for patients and workers in the radiology diagnosis sector.	Public and private hospitals, dispensaries and primary health centers, universities and educational centers, research centers, energy and radiology & renewable energy study centers & radiation protection centers.
		Clinical Psychology	English	* 5	Scientific	B.Sc. degree in Ultrasonography	Ultrasound imaging is a branch of the applied medical sciences using high frequency ultrasound waves to diagnose various diseases inside the human body. The specialization aims to graduate highly competent female personnel to cover the need of hospitals by creating a supportive environment for growth and excellence in the field of ultrasound diagnosis.	
			English	* 5	Scientific	B.Sc. degree in Radiotherapy	The specialization aims to provide the graduate with the necessary knowledge and skills to meet the demands of national & international organizations that rely on specialists in radiology field by: <ul style="list-style-type: none"> Enhancing professional characteristics and communication skills necessary for the graduate to provide high quality services in radiology. Enabling her to contribute effectively in boosting radiation health and safety in the community. Providing her with the necessary skills to conduct research work to improve the radiology treatment field. 	All public and private hospitals specializing in treatment of trauma: <ul style="list-style-type: none"> Research centers. Educational universities.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Health and Qualification Sciences	Health Communication Sciences	Speech and Swallowing Diseases	English	*5	Scientific	B.Sc. degree in Speech and Swallowing Diseases	This specialization pertains to diagnosis, treatment and qualification of speech and language disorder as well as swallowing and how to assist the patient(s) to communicate actively and effectively with the others.	Public and private hospitals, private clinics, health centers, educational institutions, qualification centers and research centers.
			English	*5	Scientific	B.Sc. degree in Hearing and Balancing	This field concerns with the diagnosis and qualification of hearing and balancing diseases for all ages in addition to prevention from the hearing diseases.	
	Qualification Sciences	Occupational Therapy	English	*5	Scientific	B.Sc. degree in Occupational Therapy	The specialization cares for maximizing awareness through supporting individual independence to perform all his daily activities & functions and to limit his dependence on the others. The occupational therapist shall deal with every person whether injured or not to reach his occupational goals.	
		Physiotherapist	English	**7	Physical	B.Sc. degree in Physiotherapy	The specialization aims to qualify distinguished female staff with scientific and practical abilities according to the professional standards to meet the needs of the labor market and to contribute to the health services in physiotherapy to compete on the local, regional and international levels by evaluating, treating and pursuing various medical conditions of physiotherapy. It actively serves the community and promote physiotherapy culture through initiatives, consultation, scientific research performed by students through some courses.	

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Health and Qualification Sciences	Qualification Sciences	Breathing Care	English	5*	Scientific	B.Sc. degree in Psychological Care	The psychological treatment program aims to prepare psychological treatment specialists to work in the clinical field and to provide care for the patients who are suffering from breathing difficulties or problems in the respiratory system.	Public and private hospitals, private clinics, health centers, educational institutions, qualification centers and research centers.

* (Foundation year + 3 years of specialization + year of internship)

** (Foundation year + 5 years of specialization + year of internship)

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Nursing	—	Nursing	English	*5	Scientific	B.Sc. degree in Psychological Care	The specialization aims to prepare and qualify national female staff with high competence to provide safe and specialized nursing care with high level of accuracy based on professional and theoretical standards in order to exercise the nursing profession at the various health institutions in the community in a bid to secure an excellent health care available for all the citizens and to enhance the nursing care and health services.	To join jobs at the various primary, public and specialized health care centers, and academic teaching sector.
	Maternity Nursing and Obstetrics and Gynecology	Midwifery	English	*5	Scientific		Princess Nourah bint Abdulrahman University provides the first B.Sc. degree in midwifery on the level of the Saudi universities. The aim is to graduate specialist in midwifery. The program is designed according to the approved international professional standards.	Midwives to work in public or private sectors (delivery rooms), Ministry of Health, obstetrics and gynecology clinics, primary health centers and home care.

* (Foundation year + 3 years of specialization + year of internship)

Secondly: Scientific and Applied Specializations

- College of Engineering
- College of Computer Science and Information Technology
- College of Business Administration
- College of Sciences
- College of Sport sciences And Physical Activity

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Engineering	Industrial and Systems Engineering	Industrial and Systems Engineering	English	*5	Scientific	B.Sc. degree in Industrial and Systems Engineering	The specialization aims to graduate engineers capable of analyzing, designing and developing the enterprises using scientific and technical solutions for production with due regard to a sound work environment based on the best quality standards. The specialization also tends to endow its graduates with high competence in the field of management, financial transactions and logistical services in the various engineering sectors along with the best operating efficiency in terms of ideal time study and optimal project management.	The engineering / non-engineering sectors offer many job opportunities for graduates of industrial engineering programs to work as industrial engineer in manufacturing systems, design and development, power generation & distribution, risk management, wholesale and retail, information systems and transmission networks.
	Electrical Engineering	Communications Engineering	English	*5	Scientific	B.Sc. degree in Communications Engineering	The specialization aims to prepare engineers qualified scientifically and professionally in all communication systems and computer networks to enable them to enter the labor work directly and keep pace with the technology related to the discipline through strong scientific qualification in the required technical skills to design and execute communication networks and determine the movement of data and its safe routes. This is in addition to handling management and maintenance of all types of networks particularly the complicated ones by proper analysis of communication systems problem, identifying their causes and finding the optimal solution.	The program qualifies the graduates to work in the public sector specializing in communication technology, local, regional and international communication companies, communication consultation offices, small and medium enterprises specializing in communication technology, equipment & communication system factories, radio and TV companies, government departments, universities and study and research centers.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Engineering	Electrical Engineering	Electronic Engineering	English	*5	Scientific	B.Sc. degree in Electrical Engineer / Electronic Engineering	The specialization is set to graduate engineers capable of keeping abreast of modern technologies in all fields of electronic engineering through strong scientific qualification in the basics of electronic engineering and mastering of the tools and analytical, experimental and computer means to identify the problems and engineering projects, develop plans for the solution according to high international technical specifications with due regard to the ethical and social aspects to ensure that the graduate is keeping pace with the continuous development in the fields of electronic engineering applications.	The program qualifies the graduates to work in engineering departments, traditional and cellular communication companies, measurement, control and maintenance in oil and gas, computer development design and maintenance, electronic fields of communication, medical equipment, airline companies, Atomic Energy Authority, power plants and their command centers, universities and study and research centers.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Engineering	Biomedical Engineering	Biomedical Engineering	English	*5	Scientific	B.Sc. degree in Biomedical Engineering	<p>The Biomedical engineering science is considered liaison between engineering and medicine. This specialization focuses on a main goal which is the design and maintenance of the various medical equipment to assist the physicians to reach accurate diagnosis of the medical conditions and to find the suitable treatment. This helps speed recovery and achieve positive results.</p> <p>Also, Biomedical engineering gathers between the biomedical sciences and the physiological and engineering sciences such as computer engineering, electrical engineering and mechanical engineering. The purpose is to understand the nature of diseases on all aspects and to deal with them and hence design appropriate medical and prosthetic devices.</p>	The program qualifies the graduated engineers to work in the design, maintenance and development of medical equipment and also in monitoring the quality of medical equipment in addition to medical metrics systems and instruments.

* (Foundation year + 4 years of specialization + year of internship)

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Information Technology and Computer Sciences	Information Systems	Information Systems	English	*4	Scientific	B.Sc. degree in Information systems	The information systems specialization is considered liaison between the computer science specialization and the various fields of work. The program aims to endow the graduate with the theoretical rules for computation and information to design, develop and operate the information systems.	Database management, information systems analysis, information security, development of information systems, information systems project management.
		Data Science and Analytics	English	*4	Scientific	B.Sc. degree in Data Science and Analytics	It is one of the new quality programs provided by the university to graduate qualified personnel capable of dealing with the data using computers and programing systems to work in the various sectors namely the Statistics Authority, the financial and banking sectors etc.	The program qualifies female personnel to work in the various data science in the public and private sectors including for example without limitation: <ul style="list-style-type: none"> - Data analyst. - Data engineer. - Data scientist. - Business intelligence analyst.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Information Technology and Computer Sciences	Information Technology	Information Technology	English	*4	Scientific	B.Sc. degree in Information Technology	The design is set to graduate students capable of handling the design, management, development and maintenance of information technology systems through the application of the proper computer and mathematical knowledge and execution and evaluation of the computer system using the necessary technology, skills and tools for computer applications and merging technological solutions with the user environment competently and efficiently and understanding the best practices, procedures and their applications.	Computer network management, information technology projects management, development and design of information technology programs, development of software, design computer systems, educational field in the institutions of public and higher education.
		Cyber Security	English	*4	Scientific	B.Sc. degree in Cyber Security	It is one of the new specializations in the university that aims to graduate qualified personnel in the field of cyber security to understand the process that affects information security and to protect the information assets, collect and keep digital evidence, analyze data, identify and rectify security holes.	The program qualifies specialists in information security capable of working in cyber security jobs in the public and private sectors.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Information Technology and Computer Sciences	Computer Science	Computer Science	English	*4	Scientific	B.Sc. degree in Computer Science	The specialization aims to prepare national qualified personnel specializing in computer science and software knowledge. It shall also develop their software knowledge for learning a number of advanced programming languages, basics of Algorithms design and analysis and data structures using the latest systems utilized for this purpose to prepare them for work in the field of programming and development of the various computer systems.	Design, programming and maintenance of computer and programming systems, design, management and operation of websites, design and develop advanced software systems and mobile computing, electronic games, work in data science and predictive analytics, design project management systems, scientific research and training at research centers and vocational training.
		Artificial Intelligence Science	English	*4	Scientific	B.Sc. degree in Artificial Intelligence Science	It is a quality artificial intelligence program considered to be one of the qualitative and future fields to go in line with the Saudi vision and the international trends. The B.Sc. degree in artificial intelligence is considered a qualitative program that aims to graduate innovators in the field of artificial intelligence and machine learning.	It qualifies the graduates to work in the field of business development of smart technological, commercial, economic and medical areas, design and manufacturing of software and smart systems in the various sectors.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Business Administration	Administration	Administration	English	*4	Scientific / Administrative	B.Sc. degree in Administration	The specialization tends to prepare pioneers or distinguished graduates in the administrative field capable of adapting to the changes in the business environment, committed to the ethics of the profession and administrative knowledge theoretically and practically to help them to competitively perform their administrative tasks in the public and private sectors and achieve the community partnership and develop the national economy.	Higher management and intermediate and direct supervisory positions along with local management, personnel, financial positions, supply and purchasing, sales and marketing, operation jobs such as: business jobs, personnel, auxiliary judicial positions jobs and at the banks.
		Marketing	English	*4	Scientific / Administrative	B.Sc. degree in Marketing	The program represents an important element in the business administration world. It aims to graduate distinguished graduates endowed with the skills and basic knowledge in fundamentals of marketing through study of modern trends in marketing principles, knowing marketing system structure and its environment, and consumer behavior. The student shall hear how to prepare marketing research work and understand the functions and tasks of sales management and marketing communications along with retail management and marketing services.	The program qualifies the graduates to work in the public and private sectors in the field of marketing such as sales management, product development, customer services and service marketing.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Business Administration	Administration	Human Resources Management	English	*4	Scientific / Administrative	B.Sc. degree in Human Resources Management	The program aims to prepare and qualify national personnel to handle the management development of human resources and manpower planning in the various units of the public and private sectors by providing them with the necessary knowledge and professional skills to work competently and professionally in the field of human resources management.	The program qualifies female administrative staff to work in the various administrative sectors in the field of the human resources.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Business Administration	Economics	Economics	English	*4	Scientific / Administrative	B.Sc. degree in Economics	The specialization is set to prepare human resources with high standard of economic knowledge in its theoretical and practical aspects in the various areas of the economy depending on a quantitative analytical methodology, and development of research skills to meet the needs of the labor market and develop the business economics.	All professions and jobs in the business field that require professional specialization in the economy in the following fields: economic researchers, specialists and advisers, researchers, specialists and advisers in planning, investment, budget, revenue and insurance, real estate and money appraisers, financing inspectors, handling financial consultation works and feasibility studies and economic evaluation of projects.

College	Section	Specialization	Language of Instruction	No. of Years of Study	Module	Graduation Certificate	Academic Nature of Specialization	Professional Status (Fields of Work)
Business Administration	Accounting	Financial Economics	English	*4	Scientific / Administrative	B.Sc. degree in Financial Economics	The program aims to prepare personnel with high theoretical and practical qualification in the various financial fields capable of developing the financial sector locally and internationally and taking part in the improvement of financial sciences through scientific research to contribute to the service of the community and maximize its financial awareness.	The job opportunities of the economic financial program in the public and private sectors work in the field of economic financial and stock analysis at money companies, firms etc.
		Accounting	English	*4	Scientific / Administrative	B.Sc. degree in Accounting	The specialization aims to prepare female highly qualified personnel in the field of accounting in order to be capable of handling the responsibilities and burdens of the profession as accountants and auditors whether in the government or business sectors and have the academic and professional knowledge and skills to stand out and face the challenges imposed by the changing business environment.
